

A Simple Laundry Tub Cover

As nice as Sandpearl is, there are some improvements that are easily made... for example:

a laundry tub cover, so clothes can be folded as they come out of the dryer..

While there are commercially available covers, they were not designed for our unique tubs.

I found a perfect low cost solution... [Amazon sells an 18" X 24" Whiteboard](#) that fits the tub perfectly.

I glued three small wood pieces to the bottom using the sink faucet as the 4th positioning "stop".

The board costs \$14. It works perfectly and stores easily behind the tub when required.

Here are some photos.
